KUALA LUMPUR: Russia-based global data loss prevention vendor, InfoWatch, is looking forward to implementing at least 20 projects in Malaysia in 2014 and 2015.

InfoWatch International Sales Director Vadim Kuznetsov said the company was currently engaging more Malaysian partners, as well as training them to integrating its solutions into the customer business processes.

"We have been in Malaysia since the end of 2013 and currently are actively developing our business through the partners' expansion," he told Bernama.

InfoWatch has at present two partners in Malaysia. The company has been implementing pilot projects with the Malaysian companies since the beginning of this year.
